

Enhancement Junior

Step-by-Step Instructions :

- 1) To begin, I had sanitized the hand by using cleanser. Nails were cut and shaped.
- 2) Pusher was then used to push back the cuticle.
- 3) To remove the shine and oil on the nail bed, I have used a 180 grit to file the nail surface. After completion, I dusted off with a nylon brush and alcohol spirit was sprayed.
- 4) 2 layers of Prima and Bonder were applied to the nail to dehydrate and improve adhesiveness.
- 5) Forms were placed when the nail had turned to chalky White.
- 6) Truly white acrylic powder was used to form smile line from the free edge. Slowly I have created a "Happy" smile line by adding bits of truly White acrylic powder on the left and right sides. Groove lines were created to give a better grip when apply the pink powder.
- 7) I then place a pink ball on the nail bed and sloing work my way back to the cuticle area.
- 8) "C" Curve was formed when the acrylic was about to dry.
- 9) After created the "C" curve and when the powder was completely dry, I start to file the nail. First, I use 100 grit for the 2 sides wall and front to form the square shape.
- 10) After that, it was followed by a 180 , 150 and sand sharp for sides and top of the nails.
- 11) 2-way puffer was used for the final touch up to give it a shine.
- 12) The other 3 nails were polished with Red nail polish.
- 13) Finally, essential oil was apply to the finger tips to give moisture.
