

These tips are Airbrushed using handcut stencils and handpainted details.

I love unicorns, butterflies and hummingbirds so I decided to incorporate them in the same picture. First I draw: unicorn, grapevine, castle, clouds, mountains, leaves, dragonfly, flower, rainbow, hummingbird on paper notes, cover the drawings with clear contact film and carefully cut the figures with exacto knife. I cutted different parts of figures in separate papers to make shadows, tail and hair details in unicorn, wings in dragonfly etc....

To begin I placed the tips over a ball of playdough on a fingerstand. I base coat tips, airbrushed white, next I airbrushed a blend of various colors to do the sky and procced to airbrush figures, mostly all of the colors are a mixtures. The butterfly is handpainted with gold and turquoise and the body is formed with silver acrylic. The hummingbird is airbrushed, accented with handpainted details on wings and eyes. The center of flowers is done with gold and silver acrylic. Grapes are airbrushed one grape at a time. Tiny flower, white stars are from stencil I already had, but I made my own stencils for everything else. I formed the horn of the unicorn with silver acrylic. Airbrush top coat to finish tips. I used a double action metal airbrush gun. Took pictures with an Olympus Camedia 540zoom 3.2 MP.
