

Enhancement Jr.

Pink and White Sculpted Liquid and Powder Nails

1. Sanitize hands
2. Perform mini manicure:
 - a. Remove non-living tissue with cuticle remover, rinse, and dry nail plates.
 - b. Gently remove shine from all ten nails using 240 grit abrasive.
 - c. Using a prep product and a plastic-backed nail wipe, dehydrate and cleanse each nail plate.
3. Apply forms to the nails of left hand.
4. Dehydrate and cleanse again.
5. Sculpt free edges in white, and apply pink to zones 2 and 3, one finger at a time. Keep C-curves natural and free edge length proportionate to nail plate by approximately 1/3.
6. Repeat steps 3 through 5 on right hand.
7. Refine shape with a 180 grit abrasive, then with a 240 and a small amount of cuticle oil.
8. Buff to high shine with a glossing block.
9. Take presentation and down the barrel photos, then polish two nails with two coats of red cream polish, followed by topcoat. Take close up photo.
10. Photos taken with five megapixel digital camera, and effects applied/touch-ups done in a photo-editing program.
