

For this set of sculpted nails I used gels.

1. Nails prepped by pushing back the cuticles, and removing the shine using 180 grit.
2. Dust removed with a nylon brush and applied alcohol based cleanser. Acid free primer applied sparingly.
3. A thin layer of bonding gel applied. Cured the nails for 2 minutes.
4. Forms applied.
5. Pink Coverage gel applied to minimize the appearance of ridges on the natural nail. Reverse technique used. Cured 2 min..
6. Competition White used to create free edge. Applied in two thinner layers and cured between each layer for 2 min.
7. Nails wiped with Gel Cleaner and shaped with 100/180 file.
8. Underside of the nails cleaned with an e-file and diamond Sciver bit.
9. Dust removed.
10. Top Gloss applied to the nails and cured 2 min.
11. Inhibition layer removed with Gel Cleaner and oil applied to the cuticles
12. Two nails polished with OPI "The Thrill of Brazil"

I used digital camera Canon Power Shot A 410. I cropped and edited the pictures using Photoshop
