# Flower Power !

1. Sanitized my hands and client's hands
2. Pushed back cuticles
3. Removed shine from nails with buffer and cut natural nails very short
4. Applied transparent tips using nail glue
5. Cut tips to desired length and removed shine from nail tips with buffer
6. Removed dust with nail brush
7. Applied dehydrator and primer to nails
8. Applied one thin coat of clear gel to entire nails and cured for 1 minute
9. Applied laser lace of different colors to nail tips, at an angle. (they remain in place since I have not removed the sticky residue from nails at previous step)
10. Applied thicker coat of clear gel over entire nails, paid attention to stress area and then cured for 2 minutes
11. Removed tacky layer from nails with gel cleanser and lint free nails pads
12. Buffed nail surface with buffer and formed nails with emery board
13. Removed dust from nails
14. Painted swirls on nails using small nail art brush and white and color acrylic paints
15. Applied finish gel to entire nails and cured for 1 minute
16. Applied 3d flowers using small acrylic brush (#2) and color acrylic powders
17. Applied color rhinestones in center of all flowers

\* Took presentation picture, then close-up picture and side picture using Kodak easyshare c340 camera.

\* Added frame to pictures using Microsoft Pictureit photo software

\* Resized pictures using PixResizer software
