

Essay:

- 1) Sanitize and prep nails as usual
- 2) Sculpt p&w over forms with l&p
- 3) File and buff smooth as usual
- 4) Apply one coat of base coat
- 5) Apply cuticle oil around cuticles and finger to easier remove excess varnish later on
- 6) Marbleize white and silver varnish in a small bowl of water
- 7) Put nails in water to achieve marbleized effect, remove excess varnish on fingers and let dry a couple of minutes
- 8) Apply one coat of topcoat and let dry
- 9) Mask half of the free edges diagonally with tape
- 10) Airbrush half of the free edges black and remove the tape
- 11) Let dry before you apply silver nail art tape between the black and the marblized varnish
- 12) Apply one coat of UV-topcoat and put one Swarovsky crystal on each finger; in the corner of the black part of the free edge, before you cure the nails in the UV-lamp
- 13) Remove tacky layer if needed, apply cuticle oil and you're done! ;-)
