

NAIL ART 2008

Having beautiful nails is very important and it reflect the general health and beauty of a person. People can look at a person and they can detect what state of health they are in. Having beautiful nails also tell you a lot about a person and their likes and lifestyles.

Having a passion to admire beautiful nails and also to do them, I was amazed I could strut my stuff on the Beauty Tech website. It is a great website where everyone can go and admire beautiful nails and there is also great products and Nail Arts anyone can purchase.

For my Nail Art Entry Mix Media JR 2008 Competition. I started out by filing the edges of the nails, I make sure there is no rough area on the nails. Then I applied the clear bottom coat twice to the nails and I make sure the nails are dry. I then applied the nail polish which is a beautiful rose pink color, this was also two coats as well. When the nails dried, I began by putting about five dots around in three circles. When the nails dry with the dark brown color, I used a silver color to make three individual dots in the circle. Then I used a green color polish with a very thin brush to do the tiny dots all around the circles. When the nails are completely dried I use the top coat clear nail polish to seal and complete my work, and make sure that the nails are properly dried.
