

Preparation for art:

1. Using a medium sized sanding band and an e-file, remove most of the enhancement product from nails (acrylic)
2. Using a 180 grit file, re-shape the free edge

"Canvas preparation":

1. Apply white acrylic polymer with iridescent glitter in the smile line area only
2. Wait until acrylic is "almost" set
3. Press wire mesh into the product leaving a patterned void
4. Using 3 different glittered polymer mixes (pink, dark blue, and purple), apply pink acrylic within the voids created by 3 in the center, blue on the right side, purple on the left.
5. Using the pink glitter polymer mixture, apply this near the smile line and fade back into the remainder of the nail bed.
6. Using a medium sized sanding band and e-file, remove product bulk to reveal the design made by the impressions
7. Cap nails in clear acrylic

Hand painting:

1. Use a dotting brush and pale pink to create "dot" flowers in the free edge area
2. Use same dotting brush, and bright yellow as the flower center
3. Use the dotting brush and a bright green to accent and create the appearance of leaves

Finishing:

1. Apply UV Sealant and cure according to Manufacturer instruction
2. Apply lotion to entire hand

Photography:

1. Take picture with digital camera
2. Resize and crop pictures within Microsoft Office Picture Manager
