Halloween Nails 2008

I started with a clear tip, at the end I laid down black acrylic and faded it up. Before the acrylic set I laid mylar pieces down. On the thumb and ring finger I placed a moon with yellow acrylic.

Then I placed orange acrylic in the center of the nail and faded it up and down slightly. Before acrylic completely set up I imbedded the ghost and spider fimo clay canes.

All other décor ("Trick Or Treat", "BOO", "Happy Halloween", the cat and the witch) are items I printed onto tissue paper from my computer and then inlaid in the nail.

Then everything was capped in clear acrylic, filed, buffed and polished with top coat.

The camera I used is a Kodak Easy Share Z812 IS
